

Video conferencing in high-fidelity.

Leon's high-fidelity speakers are custom built to **exactly** match every flat-panel display.

"Leon's cutting-edge approach to speaker building has created the flexible environment that audiophile's crave."

— Home Theater Magazine

Horizon™ Series Featured on HGTV's "I Want That: Tech Toys"

Three channels of high-fidelity audio in one sleek cabinet.

Horizon 313-LCR shown with timbre matched on-wall Leon Hz113 Surrounds.

In the custom electronics industry, one size does not fit all.

For over 10 years, Leon has specialized in high-fidelity custom speakers for flat-panel displays. After thousands of successful commercial and residential installations around the world, Leon is ready to create the perfect sound solution for any application. Each speaker is meticulously crafted by hand in just 3-5 days, and equipped with world-class components to deliver truly dynamic, high-fidelity audio to your most discerning clients. **Visit us at Booth #9305 for more information.**
