**Leon Speakers at CEDIA EXPO 2010**

For this year's trade show, Leon Speakers™ is going all out. In an effort to restore faith in a shaken industry, Leon is bringing a battery of new, over-the-top speaker designs to the custom install market. To highlight a few: a 17-foot 9-channel **interactive sound sculpture** onsite powered by kilowatts of Mac amps... the new **Profile™ 631 Series** – Leon's first 3-way speaker specifically designed for dedicated theater applications...listen to and pick up Leon's 45-pound, aluminum-faced **Aaros™ A10-UT** ultra-thin subwoofer...new architectural in-ceiling and in-wall speakers with completely updated grill designs and even higher performance...a 100" **Horizon™ 616-OS** wrapped in Velux to match a Stewart® projection screen, a **Horizon™ 515-LR** with an integrated Polycomm® video-conferencing camera, and the newly updated **Horizon™ 212 Ultra-Thin LCR**. And to display it all, a brand new, hard-core, modern industrial trade show booth fabricated by Leon in Ann Arbor, MI from over 3,000 lbs of steel, aluminum and concrete. Visit the Leon crew in Booth #3552 to see it all for yourself.

**Profile 631**

For dedicated theaters, where performance is paramount, Leon is introducing for the first time at CEDIA the Profile 631. Leon's first 3-way product was designed by acclaimed acoustician Andy Ryder to overcome the lack of midrange focus in conventional 2-way speaker design. Each channel utilizes (2) high performance 6" woofers for maximum power handling and bass extension, (2) 3" midrange drivers for ultimate clarity, and (1) 1" cloth-dome tweeter for impeccable precision and imaging. This robust design accurately reproduces the finest audio details as well as the most dominating movie effects. And, at only 4-inches deep, the Profile 631 Series integrates seamlessly into any custom dedicated theater build out. Each speaker cabinet can also be custom built-to-order to any specified height, width and/or finish. Featuring acoustically transparent, light-fast grill cloths, the Profile 631 Series is Leon's most significant dedicated theater offering to date.

The Profile 631 will be available October 2010 at a starting MSRP of \$1,995/channel.

### **Aaros A10-UT Ultra-Thin Subwoofer**

Measuring only 12.5" tall x 14.5" wide x 4.5" deep, Leon's revolutionary Aaros 10" ultra-thin "stow or show" subwoofer delivers extreme versatility and impactful low end to any space. Featuring a solid billet aluminum baffle and back, a down-firing conversion kit and multiple custom options, this highly refined sub integrates seamlessly into any room while controlling the impact of the most demanding movie tracks. At just 4.5" deep, it is easily convertible to a down-firing position to fit under a couch or hide away in any cabinet. To perfectly complement the décor, the A10-UT can also be custom finished to match any paint color or hardwood. From a performance perspective, the ultra-thin subwoofer naturally reproduces tight musical low tones and effortlessly handles home theater LFEs with impeccable clarity. And for a truly flexible solution, Leon's L3-1K 1,000w amplifier offers adjustable crossover, variable phase, and tunable EQ, allowing installers to tailor the sound of the sub to match any room. The Aaros sub is sure to exceed the audio and design demands of today's Living Space Theater applications.

The Aaros A10-UT is available now. It is listed as A10-UT-1K (which includes one A10-UT subwoofer and one L3-1K amplifier) at an MSRP of \$2,695 and A10-UT-1K-2X (which includes two A10-UT subwoofer and one L3-1K amplifier) at an MSRP of \$3,995.

### **Aaros A10-SUB Powered Subwoofer**

Leon's Aaros 10" subwoofer achieves deep bass in small space. It features a highly-specialized aluminum cone driver for extreme rigidity and excellent excursion and is powered by an ultra-efficient 500 watt Class G on-board amplifier. Its slim enclosure is only 9.5-inches deep and can be custom built-to-order to match any décor. Like the A10-UT, Leon's new A10-SUB also utilizes extreme building techniques – it is housed in a fully sealed enclosure, and reinforced with a solid billet aluminum baffle and back that is handcrafted and machined in Ann Arbor, MI. With a measured frequency response of 36–180Hz, Leon's A10-SUB is capable of effortlessly handling dedicated theater effects while seamlessly integrating into any space.

The A10-SUB is available now at an MSRP of \$1,895/ea.

### **Horizon 616-LCR-OS**

To further solidify Leon's partnership with Stewart Filmscreen®, Leon Speakers will be displaying an oversized Horizon 616 Series multichannel speaker custom built to match the exact width and finish of a 100" wide projection screen. The Horizon 616-LCR-OS can not only be built to match the exact width of any projection screen, but also its material. The lush Velux®-wrapped speaker offers the perfect marriage of audio and video in a dedicated home theater, featuring Peerless HDS 6-inch woofers and Morel MDT-29 cloth-dome tweeters for maximum power handling and sound pressure levels (SPLs). At last year's CEDIA EXPO (2009), in Stewart's booth, Leon displayed a custom 120-inch wide Horizon 616-LCR-OS built to the exact width, finish and **curvature** of Stewart's CineCurve screen. This perfect pairing initiated

a partnership that brought Leon Speakers dedicated theater products into Stewart's training and demo facility in California.

The Horizon 616-LCR-OS is now shipping at a starting MSRP of \$9,500/ea.

### **Horizon 212-UT v1.2**

Leon Speakers will be displaying an updated version of their award-winning Horizon 212 Ultra-Thin LCR, the thinnest customizable on-wall speaker on the market. Improvements include a new upgraded tweeter, an enhanced crossover network, and an entirely new mounting system that allows for razor thin installs. Every Horizon speaker is hand-crafted to the exact size and finish of any flat screen display in just 5 days in Leon's ISO-9001:2008 certified factory in Ann Arbor, MI.

The new Horizon 212-UT is now shipping at a starting MSRP of \$1,895/ea.

### **Profile 404-MC-X-A**

For the first time at CEDIA EXPO, Leon Speakers will be displaying their Profile Series Multi-Channel speakers. Leon's award-winning Profile Series was originally introduced to the custom install channel in the late 1990s, and was the first speaker line specifically designed for use with flat panel televisions as it was custom built-to-order based on the exact height and finish of the display. The Profile Series was recently revitalized with the introduction of the multi-channel option, which adds a second independent channel to each enclosure. The additional channel can be used to serve distributed audio or paired for use as a center channel for LCR and theater applications.

The Profile Series 404-MC-X-A is now shipping at an MSRP of \$3,295.
