

Superior sound is complementary.

Leon's premium Axis in-ceiling speakers have been developed to complement all of Leon's Horizon and Profile Series speakers. These high-fidelity speakers are housed in tuned acoustic suspension cabinets that maintain consistent high-quality sound performance regardless of the environment. Available with 6" and 8" drivers and 1" silk-dome pivoting tweeters, Leon's Axis Series allows you to control the direction of the sound and maximize the sonic clarity of any room.

- Fully sealed, acoustic suspension enclosure prevents sound from traveling into other rooms
- Features Leon's A.R.C. (Acoustic Resonance Control) technology to eliminate unwanted standing waves for smooth, uniform frequency response
- Retrofit design allows installation in both new and existing construction
- Includes removable metal mesh grills and built-in mounting brackets
- Can be custom painted in-house to match any color swatch or paint sample

AX-61 Dimensions: 9.5" diameter x 5.5" deep | Cut-out: 8.25" diameter **AX-81** Dimensions: 11" diameter x 7" deep | Cut-out: 9.5" diameter

Model ID	Driver Size and Description	Power	Ohms	Frequency	Sensitivity
