

Thin. Except for the sound.

Picture perfect sound™

Leon's Certified Horizon Ultra-Thin Living Space Theater system was developed to provide immersive sound in a space that's unbelievably thin. Designed to match the depth of the latest ultra-thin flat-panel displays, the speaker is an incredible 1.5" deep. But don't let the slimmess fool you. It incorporates state-of-the-art driver technology, creating an enveloping sound field that surrounds any space with cinema quality sound. And that's just the start. The revolutionary ultra-thin subwoofer features a ground-breaking design addressing the demands of the modern home theater. Only 4" deep, this barely noticeable subwoofer will disappear in any room – until it's turned on. The Horizon Ultra-Thin System provides a true theater experience, making cinematic sound effects come to life with amazing realism and power.

5.1 Ultra-Thin Living Space Theater

1 each HzUT-LCR	1 pair AX-V5	1 each A10-UT	1 each L3-1K AMP	1 each Hz-UMB-UT
