

The extreme side of performance.

Picture perfect sound™

Profile
404
X-A

The Profile 404-X-A system was assembled to bring maximum performance to any venue. Designed to perform perfectly where increased dispersion and a wide sound stage is preferred, the left and right channels can be separated for ideal placement and stereo imaging. Similar in approach to the Horizon 414-X-A, the Profile system features Peerless HDS drivers and Morel silk dome tweeters, with an extra channel built in to create a center speaker effect. With aesthetics and décor in mind, the hand-crafted speakers can be built and finished to disappear in any room. Specifically made to perform proficiently in medium to large-sized rooms, the 404-X-A system provides a high-fidelity sound experience for even the most discerning listener.
