

LEON COMMERCIAL

Sound + Style for Any Space

The Fine Art *of* Custom Audio

Art is an evolution. A balance of craftsmanship, creativity, and vision. While our company has evolved over the last 25 years, our vision has remained the same: to mix art with audio and design with technology. From inspiration to fabrication, our team of designers, engineers, and craftspeople meticulously produce the finest quality speakers, benchmade in the USA.

Leon is recognized throughout the industry for our award-winning sound and unrivaled level of customization. Every product that leaves our shop is built by hand, custom tailored to your exact specifications. Whether it's designed to match the dimensions of any display or engineered to integrate video conferencing hardware, we promise to deliver sound + style to every commercial space.

DIRECT SOURCE AUDIO

Custom Soundbars and Speakers Built to Match any Display

Built to match the exact width or height of any single or multi-display video wall, Leon's Horizon soundbars and Profile sidemount speakers pair audio directly with the video source to create a more natural listening experience that blends into any room design.

Conceal or Complement any Display with Fine Art and Custom Frames

Leon’s Media Décor products blend design with technology to enhance any display. From handcrafted Media Frames to Moving Art Screens and Art Lifts, our Media Décor solutions seamlessly integrate audio and video into any environment.

Profile Interactive with integrated PTZ video conferencing camera. Shown with Edge Media Frame

Edge Media Frame
Handcrafted to house any display and speakers, Edge conceals the mounting and wiring in one simple contemporary design.

Moving Art Screens
Conceal any display behind museum-quality, giclée-printed artwork that silently scrolls to reveal the screen behind it.

Eclipse Art Lifts
Elegantly lift artwork, sculptures, mirrors, or decorative panels to reveal and conceal any display.

CONFIGURATION OPTIONS
Edge Media Frame can be configured to accommodate any video conferencing system

ENTE SOUNDTILE

Turn Audio into Art with Ente SoundTile

The first of its kind, Ente SoundTile conceals 2-channels of audio behind custom printed artwork. Or, create a diptych or triptych configuration for even more custom projects. Choose artwork from our online gallery, including our curated Artist Edition collection, or use client-provided artwork to perfectly match the design of any space.

Standard Finishes

Ente SoundTile

A plug and play zone of reference-grade audio hidden behind custom printed artwork

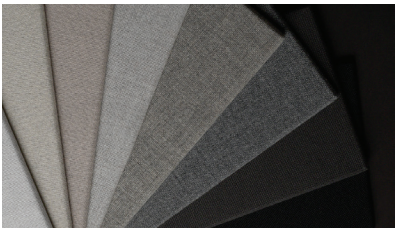

Custom Options & Design Services
