

### Description

Leon's L3-1K Class A/B subwoofer amplifier delivers the power, refinement and flexibility that our Aaros subwoofers deserve. And with 1,000W of clean power, adjustable crossover, variable phase, and tunable EQ, the L3-1K subwoofer amplifier provides fully controllable sound to enhance any listening experience.

### Recommended Pairings:

A10-UT, A3-IW (Note: One L3-1K will power up to two subs).

### Key Features

- 1,000W, dual-channel, Class A/B subwoofer amplifier provides clean, controlled output
- Low frequency parametric EQ allows you to tailor the sound
- Patented tracking down-converter power supply for high efficiency
- Manual, auto or triggered on/off for easy integration
- Switchable subsonic and bass boost filters
- High pass output sends signal back into integrated systems
